Zhi Yang (Jason) Lim

(206) - 226 - 7489 | zylim1128.github.io | zylim@uw.edu | in/lim-zhiyang

EDUCATION

University of Washington, Seattle / MS Computer Science - GPA 4.0 Exp Grad: March 2026

Courses: Deep Learning, Computer Vision, Databases Systems, Natural Language Processing

University of Washington, Seattle / BS Computer Science - GPA 3.89

Courses: Machine Learning, Distributed Systems, Operating Systems, Data Structure, Algorithms, Networking

Awards**:** Bob Bandes Memorial Teaching Award (Honorable Mention)

Scholarships: Mary Gates Leadership Scholarship, Jerre Noe Merit Scholarship (CSE department)

PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS) / Software Developer Intern June 2025 - Present

- Integrating Performance Insights onto AWS Neptune (Graph DB)

Spark / Software Engineer Intern July 2023 - August 2023

- Built a website from scratch within a 10-week timeline for a non-profit organization, creating a secure and user-friendly platform using **React.js** and **AWS Amplify**
- Developed databases from the ground up, establishing a system to manage user data and support operational workflows

UW CIRCLE / Software Engineer Lead June 2024 - October 2024

- Led the development of a **React.js** web app, create a centralized platform for real-time university updates and resources, benefiting over **5,000** international students
- Reduced the international student visa termination rate by **80%** through communication and resource accessibility

UW CSE Head Teaching Assistant / Data Structure, Stats & Probability June 2023 - June 2025

- Delivered guest lectures and facilitated weekly interactive sessions for 100+ students
- Led review sessions during office hours, addressing problem set questions for 50+ students weekly
- Taught and mentored over **1,000** students across **8+** quarters, earning an Honorable Mention for the prestigious Bob Bandes Award for excellence in teaching

UW CSE Research Assistant / RAIVN Lab June 2024 - December 2024

- Built a bot with **Python** to handle web scraping, request summarization, and model testing by processing inputs and generating output responses for image-editing tasks
- Developed and evaluated a machine learning model for image editing using REALEDIT; accepted to **CVPR 2025.** Publication here: https://arxiv.org/abs/2502.03629

PROJECTS

Detoxify | *Open Source AI Hackathon Winner* *June 2024*

- Developed an AI application with Meta Llama3 70b LLM, **Flask**, and **LangChain** to classify gaming chat toxicity
- Fine-tuned the LLM to optimize classification speed, reducing response time from 5 seconds to 0.5 seconds, enabling near real-time toxic behavior detection.

YouTube Channel - @LeetcodeDailyGrind *July 2024 - Present*

- Create daily YouTube videos simplifying LeetCode solutions in **Python** for beginners; over 70 videos posted

Distributed System Lab *Mar 2024 - June 2024*

- Implemented a sharded key-value store with multi-key updates using multi-slot Paxos algorithm in **Java**

TECHNICAL SKILLS

- **Languages** : Python, Java, JavaScript/TypeScript, C/C++, SQL
- **Tools/Frameworks** : Git, Jira, HTML/CSS, React.js, React Native, Node.js, GraphQL, AWS Amplify, Azure
